TERMS AND DEFINITIONS

Term used to denote 'disability': 'A disabled person'

Definition of this term: A disabled person is a person whose physical, sensory, and/or mental abilities or mental health are different from a typical condition adequate to his/her age and it can be relevantly presumed that this condition will last for more than 1 year. The difference from a typical condition for the adequate age must be of such an extent that it usually inflicts limitations or factual social exclusion of the given person.

Disabled persons are physical entities who are:

- Disabled people who were recognized by the social security authority as invalid in the 3rd grade. The 3rd invalidity grade means a disabled person whose working ability decreases by 70% at the minimum).
- Disabled people who were recognized by the social security authority as invalid in the 1st and 2nd grade. The 2nd invalidity grade means a decrease of working ability decreases by 50% to 69%. The 1st invalidity grade means a decrease of working ability decreases by 35% to 49%.
- Handicapped people were recognised as handicapped by the work centre (hereinafter as handicapped people).A handicapped person is a physical entity person whose ability to continuously perform a job or other earning assets is preserved, but whose abilities to be or remain included or perform the present job or use of acquire qualification are considerably limited due to unfavourable health condition. Such condition is considered to last for at least 1 year limiting physical, mental or sensorial abilities, therefore the ability of job application
