

## Methodological questionnaire

### *Statistics of employment, wages and hours of work derived from establishment surveys*

The objective of this questionnaire is to obtain information about the most important features of the establishment survey(s) carried out in your country since 1990, that are used as sources of statistics of employment, wages and/or hours of work.

Please use as many questionnaires as there are establishment sources for these statistics. For each type of survey, please respond with reference to the latest (most recent) exercise. If you have any questions on which surveys should be covered by this questionnaire, please contact [sources@ilo.org](mailto:sources@ilo.org) before completing the questionnaire. In case the most recent survey was conducted before 1990, please complete only section *A. Identification*.

This questionnaire is designed to require only a minimum of textual response. The use of pre-coded responses facilitates response but increases the number of pages in the questionnaire. The accompanying document provides international definitions and links to international classifications mentioned in this questionnaire.

We welcome any comments regarding this questionnaire (item J1. "Additional comments"). You can save and print the completed questionnaire at your convenience. Once finished, you can send it to us by clicking the submit button at the end of the questionnaire or by sending a saved copy of the completed questionnaire to [sources@ilo.org](mailto:sources@ilo.org).

Thank you for your cooperation.

### I. Historical information

#### 11. Main changes in this survey since 1990 that have led to breaks in the series

Starting with 2002, every four years, the informations regarding wages and hours of work are not available. Until 2009, data were collected only for a certain type of occupations named by the ILO that were in accordance with the main economic activity of the enterprise.

#### 12. Additional comments on the survey

Due to the implementation of ISCO-08, for the year 2011, the questionnaire was redesigned and it was decided to collect information regarding the number of full-time employees that worked the whole month and were full paid, earnings and hours of work by base groups of occupations (4 digits ISCO-08).
