

## COLOMBIA

**Region:** Americas

**Income group:** Upper-middle income

**Summary:** Colombia has reported 5 metadata sources, which collect information on international labour migration statistics. There are two survey based sources; *General Census* and *Integrated Household Survey* which are carried out by the National Administrative Department of Statistics. There are three administrative records; *Inputs and Outputs of People of the Country* and *Entry and Exit of People from the Country* held by the Special Administrative Unit Migration Colombia; *Register of Nationals Issued Work Permits* held by the Ministry of Foreign Affairs.

Geographically all of the sources cover whole country, however different population groups such as:

- *Nationals (citizens) in the country* (covered by the *General Census and the Integrated Household Survey*)
- *Nationals (citizens) employed in the country* (covered by the *General Census and the Integrated Household Survey*)
- *Nationals (citizens) living abroad* (covered by the *Entry and Exit of People from the Country*)
- *Foreigners (non-citizens) living in the country* (covered by the *General Census, the Entry and Exit of People from the Country*, and the *Register of Nationals Issued Work Permits*)
- *Foreign workers (non-citizens) living in the country* (covered by the *General Census, the Entry and Exit of People from the Country*, and the *Register of Nationals Issued Work Permits*)
- *Child workers in country* (covered by the *Integrated Household Survey*)
- *Entry nationals returning from residence abroad* (covered by the *Inputs and Outputs of People of the Country*)
- *Exit nationals going abroad to live* (covered by the *Inputs and Outputs of People of the Country*)
- *Exit nationals leaving for temporary purposes such as for tourism, shopping, visiting, business, etc.* (covered by the *Inputs and Outputs of People of the Country*)
- *Foreigners entering country to live* (covered by the *Inputs and Outputs of People of the Country*)
- *Foreigners entering country for temporary purposes, such as tourism, shopping, visiting, business, etc.* (covered by the *Inputs and Outputs of People of the Country*)

Periodicity of data collection varies depending on the type of sources. The *General Census* was last processed in 2005; the *Integrated Household Survey* is carried out on continuously basis from 2006; the *Inputs and Outputs of People of the Country* is held continuously; the *Entry and Exit of People from the Country* is released monthly; and the *Register of Nationals Issued Work Permits* is held since 2014.

Age coverage also varies depending on the type of sources. In the *Integrated Household Survey* persons aged 15 years and older are examined. The administrative records are applied to persons of all ages.

The three essential demographic characteristics covered by all the sources are age, sex, and marital status. Additionally, the survey based sources ask questions on educational attainment and household size. Data on educational attainment also can be found in the *Register of Nationals Issued Work Permits*.

International migration characteristic covered by all the sources is country of birth. In the *General Census*, questions on country of previous residence for foreigners, country of previous residence for citizens who lived abroad but returned, and information about household members who left to live, work or study abroad are added. Other various international migration statistics can be found in the administrative records, such as country entering from, country of citizenship, country of destination, country of origin, country of previous residence, country of residence, foreign workers in the country, intended duration of stay, members of household living abroad, members of household working abroad with work permits issued by the destination country, nationality, reason

for coming to country, reason for departure, second country of citizenship, time period allowed to stay, year of arrival, and year of departure.

Labour related characteristics are compiled in all the sources, the *Integrated Household Survey* contains the biggest variety of questions related to labour characteristics, such as employment status, occupation, industry/economic sector, status in employment, individual earnings per month, household income, wage or earnings rate per time period, hours usually worked, months worked in past year, and possible benefits received from the employer. The *General Census* generates data on employment status, industry/economic sector, status in employment, and disability. The administrative records compile the data on industry/economic sector, occupation, and status in employment.

Definitions of “*international migrant workers*”, “*employment*”, “*overseas visitor*”, “*country of residence*” and “*national living abroad*” are applied in the sources.

To classify occupation, industry, status in employment, and education, internationally and nationally adapted classifications are used in the survey based sources. The administrative records apply national adaptation of the international standard classification of occupation except the Register of Nationals Issued Work Permits where the classifications are not used.

Micro data files from the sources are available for research and analysis outside the agency free of charge, except the *Register of Nationals Issued Work Permits*.

## Findings:

The latest **General Census** was processed in 2005 by the National Administrative Department of Statistics, covering the whole country. There are four population groups examined in the **General Census**:

- *Nationals (citizens) in the country,*
- *Nationals (citizens) employed in the country,*
- *Foreigners (non-citizens) living in the country, and*
- *Foreign workers (non-citizens) living in the country.*

The **General Census** obtains detailed data on demographic characteristics of these population groups, such as age, sex, marital status, educational attainment, and household size. The questions raised in the assessment on the topic of international migration related characteristics are:

- Country of birth,
- Country of previous residence for foreigners, and
- Country of previous residence for citizens who lived abroad but returned.

In addition to the characteristics, the **General Census** asks information about household members who left to live, work or study abroad, such as month/year of departure. The **General Census** covers labour related characteristics of all current household members of all ages (disability) and five years old and over (others), such as:

- Employment status,
- Industry/economic sector,
- Status in employment, and
- Disability.

In the **General Census**, it is possible to identify people who worked and were born abroad. However there is no definition for "international migrant workers". To classify industry, status in employment, and education, both internationally and nationally adapted classifications are applied. For example:

- ISIC rev 3 (where four digits are used to release the data)
- National adaptation of ICSE (CISE-2000)
- ISCED-1997

Micro data is available for research and analysis outside the agency free of charge.

The **Integrated Household Survey** commenced in 2006, and is held continuously by the National Administrative Department of Statistics. A completed sample size of the examination is 232,000 and 800,000 individuals in 2014. It geographically measures the whole country and amasses information on the following three population groups aged 10 years and over.

- *Nationals (citizens) in the country,*
- *Nationals (citizens) employed in the country, and*
- *Child workers in country.*

The Survey obtains detailed data on demographic characteristics of each person in a household, such as age, sex, marital status, educational attainment, and household size. Statistics on international migration related characteristics presented through the source is country of birth. The **Integrated Household Survey** includes questions about remittances received by the household from someone living abroad. For the population groups assessed in the **Integrated Household Survey**, the data on labour related characteristics of all current household members aged 10 years and over is available, particularly for:

- Employment status,

- Occupation,
- Industry/economic sector,
- Status in employment,
- Individual earnings per month,
- Household income,
- Wage or earnings rate per time period,
- Hours usually worked, and
- Months worked in past year.

The survey also includes questions on possible benefits received from the employer, such as retirement pension, paid vacation, subsidized housing, free or subsidized food and other benefits.

In the *Integrated Household Survey*, "**employment**" refers to the occupied aged 10 years and over participated in the process of production of goods and services during the reference week;

- Work at least 1 hour in exchange for a monetary or in-kind income, or worked at least 1 hour without receiving payment as a family worker without remuneration or as workers without remuneration in other household companies.
- Not work (for vacations, leave, etc.) during the reference period, but they had a job or business, or were generally linked to any production process, and they are sure to be back in work.

To classify occupation, industry, status in employment, and education, both internationally and nationally adapted classifications are applied. For example:

- National adaptation of ISCO (National Classification of Occupation (CNO) 70.)
- ISIC rev 3 (where two digits are used to release the data)
- ICSE-1993
- ISCED-2011

Micro data is available for research and analysis outside the agency free of charge

For the Border/Admission Statistics, the Special Administrative Unit Migration Colombia continuously carries out *the Input and Outputs of People of the Country* processing the following six population groups of all ages:

- *Entry nationals returning from residence abroad;*
- *Exit nationals going abroad to live;*
- *Exit nationals leaving for temporary purposes such as for tourism, shopping, visiting, business, etc.;*
- *Foreigners entering country to live;*
- *Foreigners entering country for temporary purposes, such as tourism, shopping, visiting, business, etc.;*  
*and*

The Statistics cover data on demographic characteristics such as age, sex, and marital status. Statistics on the following international migration related characteristics are presented through the source:

- Country of birth,
- Country of citizenship,
- Country of residence,
- Country entering from,
- Reason for departure,
- Reason for coming to country,
- Intended duration of stay,
- Country of destination,
- Country of origin,
- Year of arrival,
- Time period allowed to stay, and

- Others (immigration status, city lodging).

For the population groups assessed in the Inputs and Outputs of People of the Country, the data on labour related characteristics is available, particularly for occupation.

In the statistics, "*overseas visitor*" refers to people who do not reside in Colombia and do not possess Colombian nationality while entering Colombia regularly with a migratory category recognized by the Ministry of Foreign Affairs of the Country. "*Country of residence*" is place of domicile of the national or foreigner. "*International migrant workers*" is defined as follows:

- International Migration: Movement of people who change their country of habitual residence to settle temporarily or permanently in another country.
- Migrant labour: Movement of people from the country of origin to another with a work end. Labour migration is usually governed by state migration legislation.

To classify occupation, national adaptation of ISCO (DANE Adaptation for Colombia) is applied, where four digits are used to release the data.

Micro data is available for research and analysis outside the agency free of charge.

The *Entry and Exit of People from the Country* is a registration of entries and exits of people of the country. The Special Administrative Unit Migration Colombia collects it and releases monthly. The source appraises whole country and collects data on the following three population groups of all ages.

- *Nationals (citizens) living abroad,*
- *Foreigners (non-citizens) living in the country, and*
- *Foreign workers (non-citizens) living in the country.*

In the register, data can be found on demographic characteristics such as age, sex, and marital status. International migration related characteristics accessible through the source are:

- Country of birth,
- Year of arrival,
- Reason for coming to country,
- Reason for departure,
- Nationality,
- Foreign workers in the country,
- Country of origin,
- Country of citizenship,
- Time period allowed to stay, and
- Year of departure.

For the population groups assessed in the *Entry and Exit of People from the Country*, the data on labour related characteristics is available, particularly for occupation.

In the registration, the same definition of "*international migrant workers*" as in the Inputs and Outputs of People of the Country is applied. "*Nationals living abroad*" are Colombians who at the time of entering or leaving the country manifest residing in a country other than Colombia. To classify occupation, National adaptation of ISCO (ISCO-88 Adapted by DANE for Colombia) is applied.

Micro data is available for research and analysis outside the agency.

The *Register of Nationals Issued Work Permits* is a register of nationals issuing work permits to work abroad. The Ministry of Foreign Affairs has carried out since 2014. The source appraises whole country and collects data on the following two population groups of all ages.

- *Foreigners (non-citizens) living in the country, and*
- *Foreign workers (non-citizens) living in the country.*

In the register, data can be found on demographic characteristics such as age, sex, marital status, and educational attainment. International migration related characteristics accessible through the source are:

- Country of birth,
- Second country of citizenship,
- Year of arrival,
- Reason for coming to country,
- Reason for departure,
- Nationality,
- Members of household living abroad,
- Members of household working abroad with work permits issued by the destination country,
- Country of origin,
- Country of citizenship,
- Country of previous residence,
- Time period allowed to stay, and
- Year of departure.

For the population groups assessed in the administrative record, the data on labour related characteristics is available, particularly for industry/economic sector, occupation, and status in employment.

Micro data is unavailable for research and analysis outside the agency.
