

SLOVENIA

Region: Europe and Central Asia

Income group: High income

Summary: Slovenia has reported 5 metadata sources, which collect information on international labour migration statistics. There are three survey based sources such as the *Register-based Census of Population, Households and Housing*, the *Labour Force Survey*, and the *EU-SILC*, all of which are carried out by the Statistical Office of the Republic of Slovenia (SURS). There are also two administrative records; the *Central Population Register* held by the Ministry of the Interior; the *Statistical Register of Employment* held by the Statistical Office of the Republic of Slovenia.

Geographically all the sources cover whole country, however different population groups such as:

- *Nationals (citizens) in the country (covered by the Register-based Census of Population, Households and Housing, the Labour Force Survey, the EU-SILC, and the Central Population Register),*
- *Nationals (citizens) employed in the country (covered by the Register-based Census of Population, Households and Housing, the Labour Force Survey, the EU-SILC, and the Statistical Register of Employment),*
- *Nationals (citizens) living abroad (covered by the Labour Force Survey and the Central Population Register),*
- *Foreigners (non-citizens) living in the country (covered by the Register-based Census of Population, Households and Housing, the Labour Force Survey, the EU-SILC, and the Central Population Register),*
- *Foreign workers (non-citizens) living in the country (covered by the Register-based Census of Population, Households and Housing, the Labour Force Survey, the EU-SILC, and the Statistical Register of Employment),*
- *Refugees (covered by the Labour Force Survey and the Central Population Register),*
- *Asylum seekers (covered by the Central Population Register),*
- *Child workers in country (covered by the EU-SILC), and*
- *Foreigners (non-citizens) working but not living in the country (covered by the Statistical Register of Employment).*

Periodicity of data collection varies depending on the type of source. The *Register-based Census of Population, Households and Housing* was last processed in 2011; the *Labour Force Survey* is carried out on continuously basis starting from 1993; and the *EU-SILC* is held continuously since 2005. The *Central Population Register* is released every three months starting from 1972 and the *Statistical Register of Employment* is published monthly since 1995.

All the sources are applied to persons of all ages. The five essential demographic characteristics covered by all the survey based sources are age, sex, marital status, educational attainment, and household size. In the administrative records, the data on age, sex, marital status, and education attainment can be found.

International migration characteristic covered by all the sources is country of citizenship. The questions on country of birth, country of previous residence, and foreign workers in the country are also very often asked in the surveys and administrative records. Other international migration statistics in the sources include country of previous residence for citizens who lived abroad but returned, immigrants and return migrants, country of origin, second country of citizenship, year of arrival, reason for coming to country, destination country, nationality, members of household living abroad, time period allowed to stay, and year of departure.

Labour related characteristics such as employment status, occupation, industry/economic sector, and status in employment are commonly available in the survey based sources. Additionally data on hours usually worked and possible benefits from employers can be found in the both *Labour Force Survey* and *EU-SILC*. Furthermore, questions on individual earnings per month, household income, and months worked in past year are added in the *EU-SILC*.

Definitions of “*international migrant workers*”, “*nationals living abroad*”, and “*employment*” are applied in the sources. To classify occupation, industry, status in employment, and education internationally and nationally adapted classifications are used in the sources.

Micro data files from all the sources are available for research and analysis outside the agency free of charge.

Metadata sources:

Type of source	Name of the source	Agency Responsible	Periodicity of data collection	Year the source started	Year of the last source
Q1. Population Census	Register-based Census of Population, Households and Housing	Statistical Office of the Republic of Slovenia.	-	-	2011
Q2. Household Survey	Q2.1. Labour Force Survey	Statistical Office of the Republic of Slovenia.	Continuously	1993	-
	Q2.2 EU-SILC	Statistical Office of the Republic of Slovenia.	Continuously	2005	-
Q6. Administrative Sources	Q6.1. Central Population Register	Ministry of the Interior	Every three months	1972	-
	Q6.2. Statistical Register of Employment	Statistical Office of the Republic of Slovenia.	Monthly	1995	-

Findings:

The latest *Register-based Census of Population, Households and Housing* processed in 2011 by the Statistical Office of the Republic of Slovenia, covering the whole country. There are four population groups examined in the Census:

- *Nationals (citizens) in the country,*
- *Nationals (citizens) employed in the country,*
- *Foreigners (non-citizens) living in the country, and*
- *Foreign workers (non-citizens) living in the country.*

The *Register-based Census of Population, Households and Housing* obtains detailed data on demographic characteristics of these population groups, such as age, sex, marital status, educational attainment, and household size. The questions on international migration related characteristics are:

- Country of birth,
- Country of citizenship,
- Country of previous residence for foreigners, and
- Country of previous residence for citizens who lived abroad but returned.

The **Register-based Census of Population, Households and Housing** contains questions, which help to collect information on immigrants and return migrants such as "Have you ever lived outside the country?" and "When did you arrive in this country?" The **Register-based Census of Population, Households and Housing** covers labour related characteristics of all current household members aged 15 years and over such as:

- Employment status,
- Occupation,
- Industry/economic sector, and
- Status in employment.

In the **Register-based Census of Population, Households and Housing**, "**international migrant workers**" refer to persons with registered permanent or temporary residence in Slovenia who live or intend to live in Slovenia for one year or more with foreign citizenships. "**Employment**" refers to persons who are 15 years and over in Slovenia and in one of following categories; 1) persons in paid employment performing temporary or occasional contract work, self-employed persons and farmers included in compulsory social security in Slovenia; 2) detached workers (persons employed in Slovenia but sent to work or training abroad); 3) employed, self-employed persons, or cross-border workers insured at a foreign insurance institution but included in the health care system in Slovenia; 4) contributing family workers in farmer households.

To classify occupation, industry, status in employment, and education, both internationally and nationally adapted classifications are applied. For example:

- ISCO-08;
- NACE, NAICS (where two digits are used to release the data) ;
- National adaptation of ICSE; and
- National adaptation of ISCED (KLASIUS).

Micro data are available for research and analysis outside the agency free of charge.

The **Labour Force Survey** commenced in 1993, and is held continuously by the Statistical Office of the Republic of Slovenia. A completed sample size of the examination is 7,000 households. It geographically measures the whole country and amasses information on the following population groups of all ages.

- *Nationals (citizens) in the country,*
- *Nationals (citizens) employed in the country,*
- *Nationals (citizens) living abroad,*
- *Foreigners (non-citizens) living in the country,*
- *Foreign workers (non-citizens) living in the country, and*
- *Refugees.*

The **Labour Force Survey** obtains detailed data on demographic characteristics of each person in a household, such as age, sex, marital status, educational attainment, and household size. Statistics on the following international migration related characteristics are presented through the source:

- Country of birth,
- Country of citizenship,
- Country of previous residence for foreigners,
- Foreign workers in the country, and
- Country of origin.

For the population groups assessed in the **Labour Force Survey**, the data on labour related characteristics of all household members aged 15 years and over are available, particularly for:

- Employment status,
- Occupation,
- Industry/economic sector,
- Status in employment, and
- Hours usually worked.

The survey also includes questions on the possible benefits received from the employer such as unemployment benefits. To classify occupation, industry, status in employment, and education, internationally adapted classifications are applied. For example:

- ISCO-08 (where one digit is used to release the data);
- NACE, NAICS (where one digit is used to release the data);
- ICSE-1993; and
- ISCED-2011.

Micro data are available for research and analysis outside the agency under certain conditions free of charge.

The *EU-SILC* commenced in 2005, and is held continuously by the Statistical Office of the Republic of Slovenia. A completed sample size of the examination is 9,000 households with 27,000 individuals. It geographically measures the whole country and amasses information on the following population groups of all ages.

- *Nationals (citizens) in the country,*
- *Nationals (citizens) employed in the country,*
- *Foreigners (non-citizens) living in the country,*
- *Foreign workers (non-citizens) living in the country, and*
- *Child workers in country.*

The *EU-SILC* obtains detailed data on demographic characteristics of each person in a household, such as age, sex, marital status, educational attainment, and household size. Statistics on the following international migration related characteristics are presented through the source:

- Country of birth,
- Country of citizenship,
- Second country of citizenship, and
- Country of previous residence for foreigners.

For the population groups assessed in the *EU-SILC*, the data on labour related characteristics of all current household members aged 16 years and over is available, particularly for:

- Employment status,
- Occupation,
- Industry/economic sector,
- Status in employment,
- Individual earnings per month,
- Household income,
- Hours usually worked, and
- Months worked in past year.

The *EU-SILC* also includes questions on the possible benefits received from the employer such as free or subsidized food. In the source, "*employment*" status of the person is collected according to the personal opinion. To classify occupation, industry, status in employment, and education, internationally adapted classifications are applied. For example:

- ISCO-08 (where two digits are used to release the data);

- NACE, NAICS (where two digits are used to release the data);
- EU-SILC classification of status in employment used in all EU countries; and
- ISCED-2011.

Micro data are available for research and analysis outside the agency excluding some variables under a contract between the SURS and users in free of charge.

The **Central Population Register** (CPR) is carried out by the Ministry of the Interior and released every three months from 1972. The source appraises whole country and collects data on the following population groups of all ages.

- *Nationals (citizens) in the country,*
- *Nationals (citizens) living abroad,*
- *Foreigners (non-citizens) living in the country,*
- *Refugees, and*
- *Asylum seekers.*

The source collects age, sex, and marital status for data on demographic characteristics. International migration related characteristics accessible through the source are:

- Country of birth,
- Second country of citizenship,
- Year of arrival,
- Reason for coming to country,
- Destination country,
- Country of citizenship,
- Nationality,
- Foreign workers in the country,
- Members of household living abroad,
- Country of origin,
- Country of previous residence,
- Time period allowed to stay,
- Year of departure, and
- Other characteristics deduced from other information.

In the **Central Population Register** (CPR), "**national living abroad**" covers following nationals; 1) persons with no registered residence in the country; 2) persons with registered residence in the country who has been absent from the country for at least 12 months (having registered their temporary absence prior to departure)

Micro data are available for research and analysis outside the agency free of charge.

The **Statistical Register of Employment** is carried out by the Statistical Office of the Republic of Slovenia (SURS) and released monthly, starting from 1995. The source appraises whole country and collects data on the following population groups of all ages.

- *Nationals (citizens) employed in the country,*
- *Foreign workers (non-citizens) living in the country, and*
- *Foreigners (non-citizens) working but not living in the country (daily migrants).*

In the register, data can be found on demographic characteristics such as age, sex, marital status, and educational attainment. International migration related characteristics accessible through the source are country of citizenship and foreign workers in the country. For the population groups assessed in the **Statistical Register of Employment**, the data on labour related characteristics is available, particularly for industry/economic sector, occupation, and status in employment.

In the *Statistical Register of Employment*, the "*international migrant workers*" are employed or self-employed in Slovenia and they are not citizens of Slovenia. "*Employment*" covers employed or self-employed.

To classify occupation, industry, status in employment, and education, both internationally and nationally adapted classifications are applied. For example:

- ISCO-08 (where four digits are used to release the data);
- NACE, NAICS (where two digits are used to release the data);
- National classification of status in employment; and
- ISCED-2011.

Micro data are available for research and analysis outside the agency on the basis of contracts free of charge.

Q1. Population Census

SOURCE

Title of source: Register-based Census of Population, Households and Housing

Year of last census: 2011

Agency responsible: Statistical Office of the Republic of Slovenia

COVERAGE

Geographical coverage: Whole country

Population groups covered: Nationals (citizens) in the country, nationals (citizens) employed in the country, foreigners (non-citizens) living in the country, foreign workers (non-citizens) living in the country, foreigners with registered residence fulfilling the conditions to be counted as resident of Slovenia at the reference date (1 January 2011)

- **Publication/dissemination of data on population groups covered:** Nationals (citizens) in the country, nationals (citizens) employed in the country, foreigners (non-citizens) living in the country, foreign workers (non-citizens) living in the country, foreigners with registered residence fulfilling the conditions to be counted as resident of Slovenia at the reference date (1 January 2011)

TOPIC COVERED

Demographic characteristics: Age, sex, marital status, educational attainment, household size

International migration related characteristics: Country of birth, country of citizenship, country of previous residence for foreigners, country of previous residence for citizens who lived abroad but returned

- **Coverage for international migration related characteristics:**
 - **Country of birth, Country of citizenship, and Country of previous residence for foreigners:** All persons
 - **Country of previous residence for citizens who lived abroad but returned:** Not for all
- **Exceptions for international migration related characteristics:**
 - **Exceptions for country of previous residence for citizens who lived abroad but returned:** Only if the last migration was from abroad (no further internal migration after that)

Information about household members left to live abroad: No

Labour related characteristics of all current household members: Employment status, occupation, industry/economic sector, status in employment

- **Age coverage:** 15 years old and over

Remittances related characteristics: N.A.

Information on immigrants and return migrants: Yes (Questions like "Have you ever lived outside the country?" and "When did you arrive in this country?")

- **Information on the situation of the person prior to leaving the household last time is obtained:** N.A.

Data collected and not published/disseminated: No

CONCEPTS AND DEFINITIONS

Definition of international migrant workers: It refers to persons with registered permanent or temporary residence in Slovenia, who live or intend to live in Slovenia for one year or more with foreign citizenships.

Definition of national (citizen) living abroad: N.A.

Definition of employment: It refers to persons who are 15 years and over in Slovenia, and in one of following categories; 1) persons in paid employment performing temporary or occasional contract work, self-employed persons and farmers included in compulsory social security in Slovenia; 2) detached workers (persons employed in Slovenia but sent to work or training abroad); 3) employed, self-employed persons, or cross-border workers insured at a foreign insurance institution but included in the health care system in Slovenia; 4) contributing family workers in farmer households.

CLASSIFICATION

Classification used for occupation: ISCO-08

- **Number of digits used to release occupation data:** N.A.

Classification used for industry: NACE, NAICS

- **Number of digits used to release industry data:** 2

Classification used for status in employment: National adaptation of ICSE

Classification used for status in education: National adaptation of ISCED (KLASIUS)

DATA COLLECTION AND DISSEMINATION

Data collection method: Administrative sources

Compulsory participation of households: N.A.

Official estimate of under-coverage rate: No

Dissemination of results: Printed publications (People, Families, Dwellings - <http://www.stat.si/StatWeb/glavnavigacija/podatki/publikacije/spletni-katalog-publikacij/iskalnik-publikacij?id=3712>), Web site (<http://pxweb.stat.si/pxweb/Dialog/statfile1.asp>, <http://www.stat.si/popis2011/eng/Default.aspx?lang=eng>)

Metadata has been prepared and disseminated: Yes

Micro-data availability outside NSO/responsible agency: Yes

- **Limitations:** N.A.
- **Cost of obtaining micro-data:** Free of charge.

Q2.1. Household Survey: Labour Force Survey

SOURCE

Title of survey: Labour Force Survey

Agency responsible: Statistical Office of the Republic of Slovenia (SURS)

PERIODICITY AND COVERAGE

Periodicity of data collection: Continuously

Year the survey first started: 1993

Geographical coverage: Whole country

Population groups covered: Nationals (citizens) in the country, nationals (citizens) employed in the country, nationals (citizens) living abroad, foreigners (non-citizens) living in the country, foreign workers (non-citizens) living in the country, refugees

- **Publication/dissemination of data on population groups covered:** Nationals (citizens) in the country, nationals (citizens) employed in the country, foreigners (non-citizens) living in the country, foreign workers (non-citizens) living in the country

Age coverage: All ages

TOPIC COVERED

Demographic characteristics: Age, sex, marital status, educational attainment, household size

International migration related characteristics: Country of birth, country of citizenship, country of previous residence for foreigners, foreign workers in the country, country of origin

- **Coverage for international migration related characteristics:** All persons
- **Exceptions for international migration related characteristics:** N.A.

Information about household members left to live abroad: No

Labour related characteristics of all current household members: Employment status, occupation, industry/economic sector, status in employment, hours usually worked

Benefits received from the employer: Unemployment benefits

Remittances related characteristics: No

Information on immigrants and return migrants: No

- **Information on the situation of the person prior to leaving the household last time is obtained:** N.A.

Data collected and not published/disseminated: No

Information on persons who left to live or work abroad (recruitment, communication, assistance etc.): No

CONCEPTS AND DEFINITIONS

Definition of international migrant workers: N.A.

Definition of national (citizen) living abroad: N.A.

Definition of employment: N.A.

CLASSIFICATION

Classification used for occupation: ISCO-08

- **Number of digits used to release occupation data:** 1

Classification used for industry: NACE, NAICS

- **Number of digits used to release industry data:** 1

Classification used for status in employment: ICSE-1993

Classification used for status in education: ISCED-2011

DATA COLLECTION AND DISSEMINATION

Data collection method: Face-to-face computer assisted interview by census enumerator (CAPI), computer assisted telephone interview by enumerator with data recorded on computer (CATI)

Compulsory participation of households: No

Dissemination of results: Web site (www.stat.si)

Metadata has been prepared and disseminated: Yes

Micro-data availability outside NSO/responsible agency: Yes

- **Limitations:** Available under certain condition; researchers fill in the form for obtaining micro-data. Requests are handled by SURS's Data Protection Committee, which prepares proposals for decisions for the Board of SURS's Director-General, which decides on the requests.
- **Cost of obtaining micro-data:** There is no costs of obtaining the micro-data file

SAMPLE DESIGN

Sample frame used: Administrative register (Central register of population)

Completed sample size: Total households(7,000)

Evaluation of the overall response rate or refusal rate: Yes

Q2.2. Household Survey: EU-SILC

SOURCE

Title of survey: EU-SILC

Agency responsible: The Statistical Office of the Republic of Slovenia

PERIODICITY AND COVERAGE

Periodicity of data collection: Continuously

Year the survey first started: 2005

Geographical coverage: Whole country

Population groups covered: Nationals (citizens) in the country, nationals (citizens) employed in the country, foreigners (non-citizens) living in the country, foreign workers (non-citizens) living in the country, child workers in country

- **Publication/dissemination of data on population groups covered:** No

Age coverage: All ages

TOPIC COVERED

Demographic characteristics: Age, sex, marital status, educational attainment, household size

International migration related characteristics: Country of birth, country of citizenship, second country of citizenship, country of previous residence for foreigners

- **Coverage for international migration related characteristics:** All persons
- **Exceptions for international migration related characteristics:** N.A.

Information about household members left to live abroad: No

Labour related characteristics of all current household members: Employment status, occupation, industry/economic sector, status in employment, individual earnings per month, household income, hours usually worked, months worked in past year

Benefits received from the employer: Free or subsidized food

Remittances related characteristics: No

Information on immigrants and return migrants: No

Information on the situation of the person prior to leaving the household last time is obtained: N.A.

Data collected and not published/disseminated: Yes

- **Number and name of question not published:** All background variables such as gender, age, employment status, occupation, industry, etc.
- **Reason not published:** Purpose of EU-SILC is data on living conditions, variables about work are only background variables

Information on persons who left to live or work abroad (recruitment, communication, assistance etc.): No

CONCEPTS AND DEFINITIONS

Definition of international migrant workers: N.A.

Definition of national (citizen) living abroad: N.A.

Definition of employment: The status of the person is collected according to the personal opinion.

CLASSIFICATION

Classification used for occupation: ISCO-08

- **Number of digits used to release occupation data:** 2

Classification used for industry: NACE, NAICS

- **Number of digits used to release industry data:** 2

Classification used for status in employment: EU-SILC classification used in all EU countries

Classification used for status in education: ISCED-2011

DATA COLLECTION AND DISSEMINATION

Data collection method: Face-to-face computer assisted interview by census enumerator (CAPI), computer assisted telephone interview by enumerator with data recorded on computer (CATI), administrative sources

Compulsory participation of households: No

Dissemination of results: Web site (www.stat.si)

Metadata has been prepared and disseminated: Yes

Micro-data availability outside NSO/responsible agency: Yes

- **Limitations:** After receiving the request, SURS prepare the contract and declaration about using the data. Both parties must sign the contract. According to the rules for disclosure control, the following data are not provided: region, degree of urbanisation, month of birth, citizenship, year of immigration, country of birth.
- **Cost of obtaining micro-data:** Free of charge

SAMPLE DESIGN

Sample frame used: Administrative register (Central register of population)

Completed sample size:

- **Total household:** 9,000
- **Total individuals:** 27,000

Evaluation of the overall response rate or refusal rate: Yes

Q6.1. Administrative Sources: Central Population Register (CRP)

SOURCE

Title of administrative source: Central Population Register (CPR)

Agency responsible: Ministry of the Interior

Kind of source: Continuous population register (This administrative source, maintained by the Ministry of the Interior, is used by the Statistical Office as the only source for population and migration statistics, while it is combined with other sources in other demographic surveys. It is also used in other surveys at the Statistical Office)

PERIODICITY AND COVERAGE

Periodicity of data release: Every three months (This source is used in many statistical surveys. The answer of "every 3 months" refers to the periodicity of publication of data on the number of population. Final data on migration are published annually. The Statistical Office releases statistically processed data based on this source, the data published are not a direct tabulation from the source)

Year the source first started: 1972

Geographical coverage: Whole country

Population coverage: Nationals (citizens) in the country, nationals (citizens) living abroad, foreigners (non-citizens) living in the country, refugees, asylum seekers, other foreigners (Persons ever assigned a PIN even if they have never resided/worked in the country, for example a foreign couple who was only in the country to get married. There is no specific information on employment in the source itself, except possibly on type of residence permit (which can be employment-based). SURS does however collect data on employment from other sources and combines them with this source.

- **Publication/dissemination of data on population groups covered:** Nationals (citizens) in the country, nationals (citizens) employed in the country, foreigners (non-citizens) living in the country, foreign workers (non-citizens) living in the country

Age coverage: All ages

DATA COLLECTED ON PERSONS IN THE ADMINISTRATIVE SOURCE

Demographic characteristics: Age, sex, marital status

Migration related characteristics: Country of birth, second country of citizenship, year of arrival, reason for coming to country, destination country, country of citizenship, nationality, foreign workers in the country, members of household living abroad, country of origin, country of previous residence, time period allowed to stay, year of departure, time period allowed to stay, other characteristics (Some data are not collected directly but can be deduced from other information (e.g. reason for coming to the country is deduced from the type of residence permit))

Labour related characteristics: N.A.

Data collected and not published/disseminated: Yes

- **Number and name of question not published:** C2 Second country of citizenship; C2 Time period allowed to stay
- **Reason not published:** Data on second country of citizenship are unreliable and only used as auxiliary data in the process of producing migration statistics. Time period allowed to stay (namely validity of residence permit) is used to determine the intention of stay (if 12 months or more, person is counted as usually resident and can also be an international migrant).

CONCEPTS AND DEFINITIONS

Definition of international migrant workers: N.A.

Definition of short-term migrant workers: N.A.

Definition of a national living abroad: It covers following nationals; 1) persons with no registered residence in the country; 2) persons with registered residence in the country who has been absent from the country for at least 12 months (having registered their temporary absence prior to departure)

Definition of employment: N.A.

Definition of individual earnings: N.A.

CLASSIFICATION

Classification used for occupation: N.A.

- **Number of digits used to release occupation data:** N.A.

Classification used for industry: N.A.

- **Number of digits used to release industry data:** N.A.

Classification used for status in employment: N.A.

Classification used for status in education: N.A.

DATA COLLECTION AND DISSEMINATION

Compulsory registration for the population groups covered: Yes

Official estimate of coverage rate: N.A.

Dissemination of results:
Web site (<http://www.stat.si/StatWeb/en/field-overview?id=17&headerbar=13>). Most recent data published July 2015. Note: The published data are statistically processed data based on this source, they are not a direct tabulation from the source)

Metadata has been prepared and disseminated: No

Micro-data availability outside NSO/responsible agency: Yes

- **Limitations:** www.stat.si/StatWeb/en/mainnavigation/data/for-researchers/data-sets
- **Cost of obtaining micro-data:** Free of charge.

Q6.2. Administrative Sources: Statistical Register of Employment

SOURCE

Title of source: Statistical Register of Employment

Agency responsible: Statistical Office of the Republic of Slovenia (SURS)

Kind of source: Social security registration system

PERIODICITY AND COVERAGE

Periodicity of data release: Every month

Year the source first started: 1995

Geographical coverage: Whole country

Population coverage: Nationals (citizens) employed in the country, foreign workers (non-citizens) living in the country, foreigners (non-citizens) working but not living in the country (daily migrants)

- **Publication/dissemination of data on population groups covered:** Nationals (citizens) employed in the country, foreign workers (non-citizens) living in the country, foreigners (non-citizens) working but not living in the country (daily migrants)

Age coverage: All ages

DATA COLLECTED ON PERSONS IN THE ADMINISTRATIVE SOURCE

Demographic characteristics: Age, sex, marital status, educational attainment

Migration related characteristics: Country of citizenship, foreign workers in the country

Labour related characteristics: Industry/economic sector, occupation, status in employment

Data collected and not published/disseminated: Yes

- **Number and name of question not published:** C1, C2, C3
- **Reason not published:** Data regarding the migrations in employment in Slovenia are published only by sectors of economic activities, sex and the indicator if migrants are citizens of EU countries or non EU countries. More detailed data are available by citizens but they are not published because of the sensitivity.

CONCEPTS AND DEFINITIONS

Definition of international migrant workers: It refers to employed or self-employed in Slovenia and they are not citizens of Slovenia.

Definition of short-term migrant workers: N.A.

Definition of a national living abroad: N.A.

Definition of employment: It means employed or self-employed.

Definition of individual earnings: N.A.

CLASSIFICATION

Classification used for occupation: ISCO-08

- **Number of digits used to release occupation data:** 4

Classification used for industry: NACE, NAICS

- **Number of digits used to release industry data:** 2

Classification used for status in employment: National classification

Classification used for status in education: ISCED-2011

DATA COLLECTION AND DISSEMINATION

Compulsory registration for the population groups covered: Yes

Official estimate of coverage rate:

- **Coverage rate of total employed population:** 100%

Dissemination of results: Web site

(http://pxweb.stat.si/pxweb/Dialog/varval.asp?ma=0700925S&ti=&path=../Database/Dem_soc/07_trg_dela/05_akt_preb_po_regis_virih/01_07009_aktivno_preb_mesecno/&lang=2)

Metadata has been prepared and disseminated: No

Micro-data availability outside NSO/responsible agency: Yes

- **Limitations:** Micro data are available on the basis of contracts for scientific research purposes.
- **Cost of obtaining micro-data:** Free of charge.
