

## OSH Encyclopaedia

- Chapters, articles
- Tables, figures
- Audiovisual materials
- References
- Author biographies
- Indexes

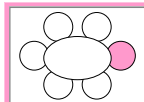

## Lexicographic information

- Thesaurus
- Glossary
- Lexicon articles

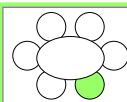

## Bibliographic information

- CISDOC
- Subscription to major databases
- Simultaneous search of multiple sites (e.g.: CIS Centres)

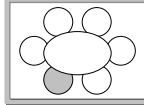

## ILO materials

- Conventions, Recommendations
- Policy documents (ILC, Governing Body)
- Codes of Practice
- Training materials
- Publications (incl. audiovisual)
- Databases (Labordoc, Laborsta, Natlex)

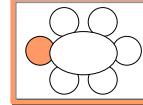

## Satellite collections

- International Chemical Safety Cards
- Hazard Datasheets on Occupations
- Occupational Exposure Limits

## Calculations

- International Chemical Control Toolkit
- Nanoparticle Exposure Toolkit
- Toolbox management application

## External sources

- CIS Centres News
- Subscription to news services
- Directory of OSH Institutions
- Links to user forums, wikis

## Main characteristics

- [Relational database model \(Oracle\)](#)
- [Entirely Internet-based management](#)
- [Multiple language versions](#)
- Integrating our own information sources with reliable Web information
- Consistent look-and-feel of components
- Reduced development costs
- Resource-optimized management

## Relational database model (Oracle)

- Robust data and program structures
- Fast access methods
- Efficient search (SQL)
- Flexible programming (PL/SQL)
- Reliable security and integrity solutions
- Expandability

## Internet-based management

- Access to all: one version, different views
- User-friendly interfaces (AJAX)
- Programmed connections of components
- Integration into the ILO web site
- Links to external Web pages, databases
- Platform independency
- User feedback and Web statistics

## Multiple language versions

- All components are available in English
- Any component can be translated to any other language
- Non-Latin alphabets (UNICODE)
- Batch translation of entire components
- Automatic tracking of changes
- Uniform translation security scheme
- Overview of available languages versions
