✓ **PHYSICAL LIBRARY**

# **NATIONAL CENTRE CIS**

**Reception and distribution of database of CIS in the SRT.**

**There was a growth of users thanks to the positive result of its activities as well as its new presence in the web site: [www.srt.gov.ar](http://www.srt.gov.ar)**

**We have sent to the CIS Centre**

**✓ A speciall publication of the theory and clincal cases discussed in monthly clinical solving meetings to address occupational respiratory diseases.**

- ✓ We have a special annual Research Program concerning occupational risks. During 2006 we published the results of some researches done by our specialists from different national universities.**
- ✓ Investigation and development of a good practices code for the occupational safety and health services.**
- ✓ Occupational accidents of migrantes workers without registration. City of Rosario and Buenos Aires.**
- ✓ Working conditions and competitiveness. A study in Argentine, steel industry.**

**✓ Actions on small and medium enterprises (national companies of industry and services). Scoop of ergonomic recommendations: simple and of low cost measures.**

**We are specially proud of two small publications that had been done by our workers.**

**We work with the trade unions helping them to train other workers about the labor risks of each individual activity.**

**This year we sent to the CIS Centre in Geneve the manuals that result from the training activities of:**

- ✓ **Occupational safety for TV cable installation workers**
- ✓ **A guide of occupational safety for cleaning workers**
- ✓ **A publication of the ceramica workers, is going to be send as soon as possible.**

## **VIRTUAL LIBRARY**

- **The access to CIS via web has contributed to the growth of users.**
- **The virtual site is dynamically maintained and constantly updated to keep up with the welcome demand.**

**Most recently we have been adding to our virtual library two researchs done by professionals of the Superintendency of Labour Risks:**

**#The study of posttraumatic stress among train engineer (drivers) in the case of accidents running over people or vehicles**

**#A study of the working and environmental conditions in sawmills. Mesopotamia Region. Argentina**

## **PHYSICAL LIBRARY**

**The operation and use of the Library has been enhanced by the implementation of new software.**

**There are approximately 4000 publications of all types (including videos, cd 's and magazines)**

**We received a large donation of his personal collection, from the Superintendence of Labour Risks General Manager, Dr. Carlos Rodriguez. It has been processed and increased the collection of our Library in 1.800 titles.**

# **STATISTICS**

**from October 2006 to September 2007**
