propaganda campaign about the aims, tasks and the character of the Congress, they managed to attract for participating in it prominent

officials of the federal and regional ministries and departments, deputies of the State Duma of the Russian Federation, foreign experts.

Within the framework of the subject they were solving the following tasks:

- elaborating scientific and methodic proposals required for preparing and holding great mass events, such as, for example, the IV International Congress “Safety and labour protection – 2006”;
- giving a possibility to collaborators of executive power on labour issues of the subjects of the Russian Federation, to scientific workers, representatives of the Employers’ and Employees’ Organizations, to get acquainted directly with the policies of The Ministry of

of Russia approved the experiment of cooperation between Federal State Institution-VCOT and Management of the exhibition “Telogreika” on organizing and holding large scale events on occupational health and recommended to continue this successful undertaking.

Russia, already in March, there were started activities on mobilizing all efforts towards organizing a campaign in connection with World Day for Occupational Safety in support of the slogan of the International Labour Organization “For decent work, safe work. For protection against VID/AIDS”.

discussions”, by speeches of experts and leaders of services on occupational safety in the mass media, at enterprises and in organizations. It is important that such meetings were organized on the three partite basis with participation of representatives of local authorities, trade unions and organizations of employees,
