  - World Day for Safety and Health at Work 20 April 2008

## CIS

The screenshot shows the CIS website with a navigation menu on the left and a main content area. The navigation menu includes:
 

- Program
- Objectives
- Structure
- Partners
- Activities & Network
- Work & News
- News
- Members
- Contact us

The main content area features the CIS logo and the text:
 

**CIS Worldwide Networking Since 1959**

CIS is the knowledge management arm of the Programme on Safety and Health at Work and the Environment (SafeWork). Its goal is to ensure that workers and everyone concerned with their protection have access to the facts they need to prevent occupational injuries and diseases. CIS continuously monitors world literature on occupational safety and health through its contacts with publishers and with 140 focal points (CIS Centres) at the national or regional level. Summaries and citations of the most useful publications, as well as products based on the collected information, are disseminated electronically and in print. The network of CIS Centres contributes to the exchange of information among persons responsible for the establishment and implementation of national policies and programmes.

CIS was founded in 1959 as a joint initiative of the ILO, the International Social Security Association (ISSA), the European Coal and Steel Community and the occupational safety and health authorities of 11 European countries. The original 11-member network of National Centres has grown to cover 100 countries all over the world. In many countries, Collaborating Centres complement the National Centres and the CIS network also comprises 2 Regional Centres, the Arab Occupational Health and Safety Institute of the Arab Labour Organization in Damascus (Sina) became a CIS Centre in 2004 and the African Regional Labour Administration Centre in Harare (Zimbabwe), in 2006. With the evolution of European institutions, CIS now enjoys the support of the European Commission.

The menus to the left provide access to the full range of CIS databases and publications. They also link to details about the programme and budget of the CIS, its network of Centres and a number of occupational safety and health information sources inside and outside the ILO.

## Safework Bookshelf

The screenshot shows the Safework Bookshelf website with a dark background and a central image of a worker. The text reads:
 

**SafeWork Bookshelf**

The Safework Bookshelf is a collection of key OSH documents produced, in whole or in part, by the ILO. It was compiled by CIS, the information arm of the Safework Programme of the ILO.

The Safework Bookshelf consists of the following items:

- ILO Encyclopaedia of Occupational Health and Safety
- International Chemical Safety Cards
- ILO Conventions and Recommendations on OSH
- ILO Codes of Practice

The Safework Bookshelf is available on the Internet and on CDs, in both English and French.

**Internet** **CD**

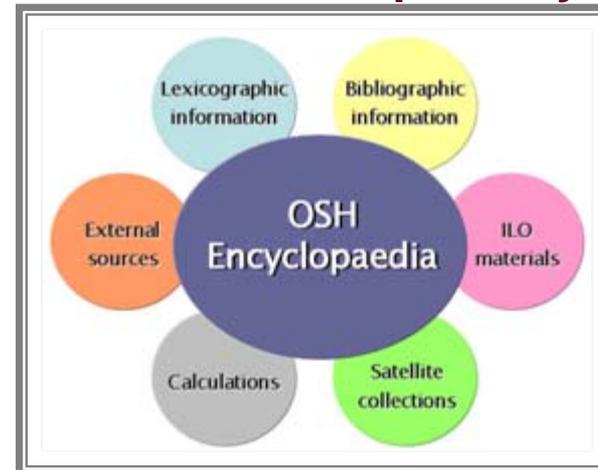

English: [www.ilo.org/safework\\_bookshelf/](http://www.ilo.org/safework_bookshelf/) ISBN 92-2-110075-1 ISBN 978-92-2-110075-9

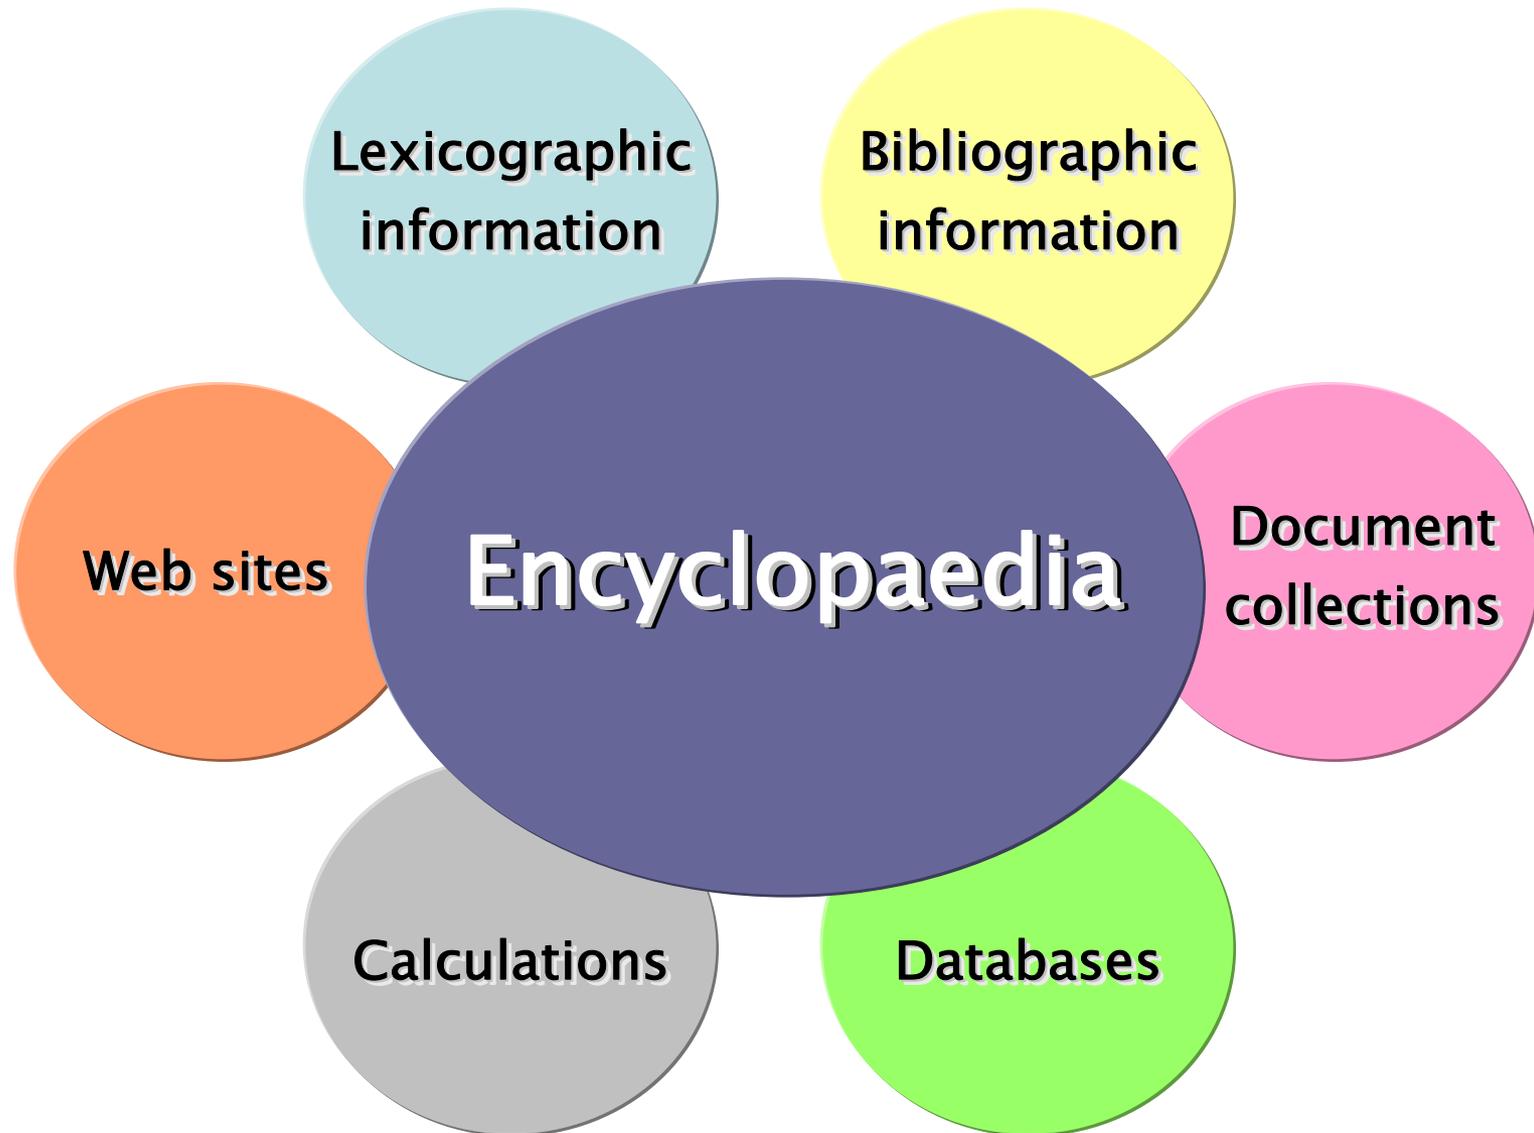

French: [www.ilo.org/safework\\_bookshelf/](http://www.ilo.org/safework_bookshelf/) ISBN 92-2-10075-6 ISBN 978-92-2-10075-2

## Safework

The screenshot shows a web browser displaying the Safework website's 'Media and public information' section. The page features a search bar, a list of news items with images, and a sidebar with navigation options. The main content area includes a section titled 'Media and public information' with a sub-section 'News and public information'.

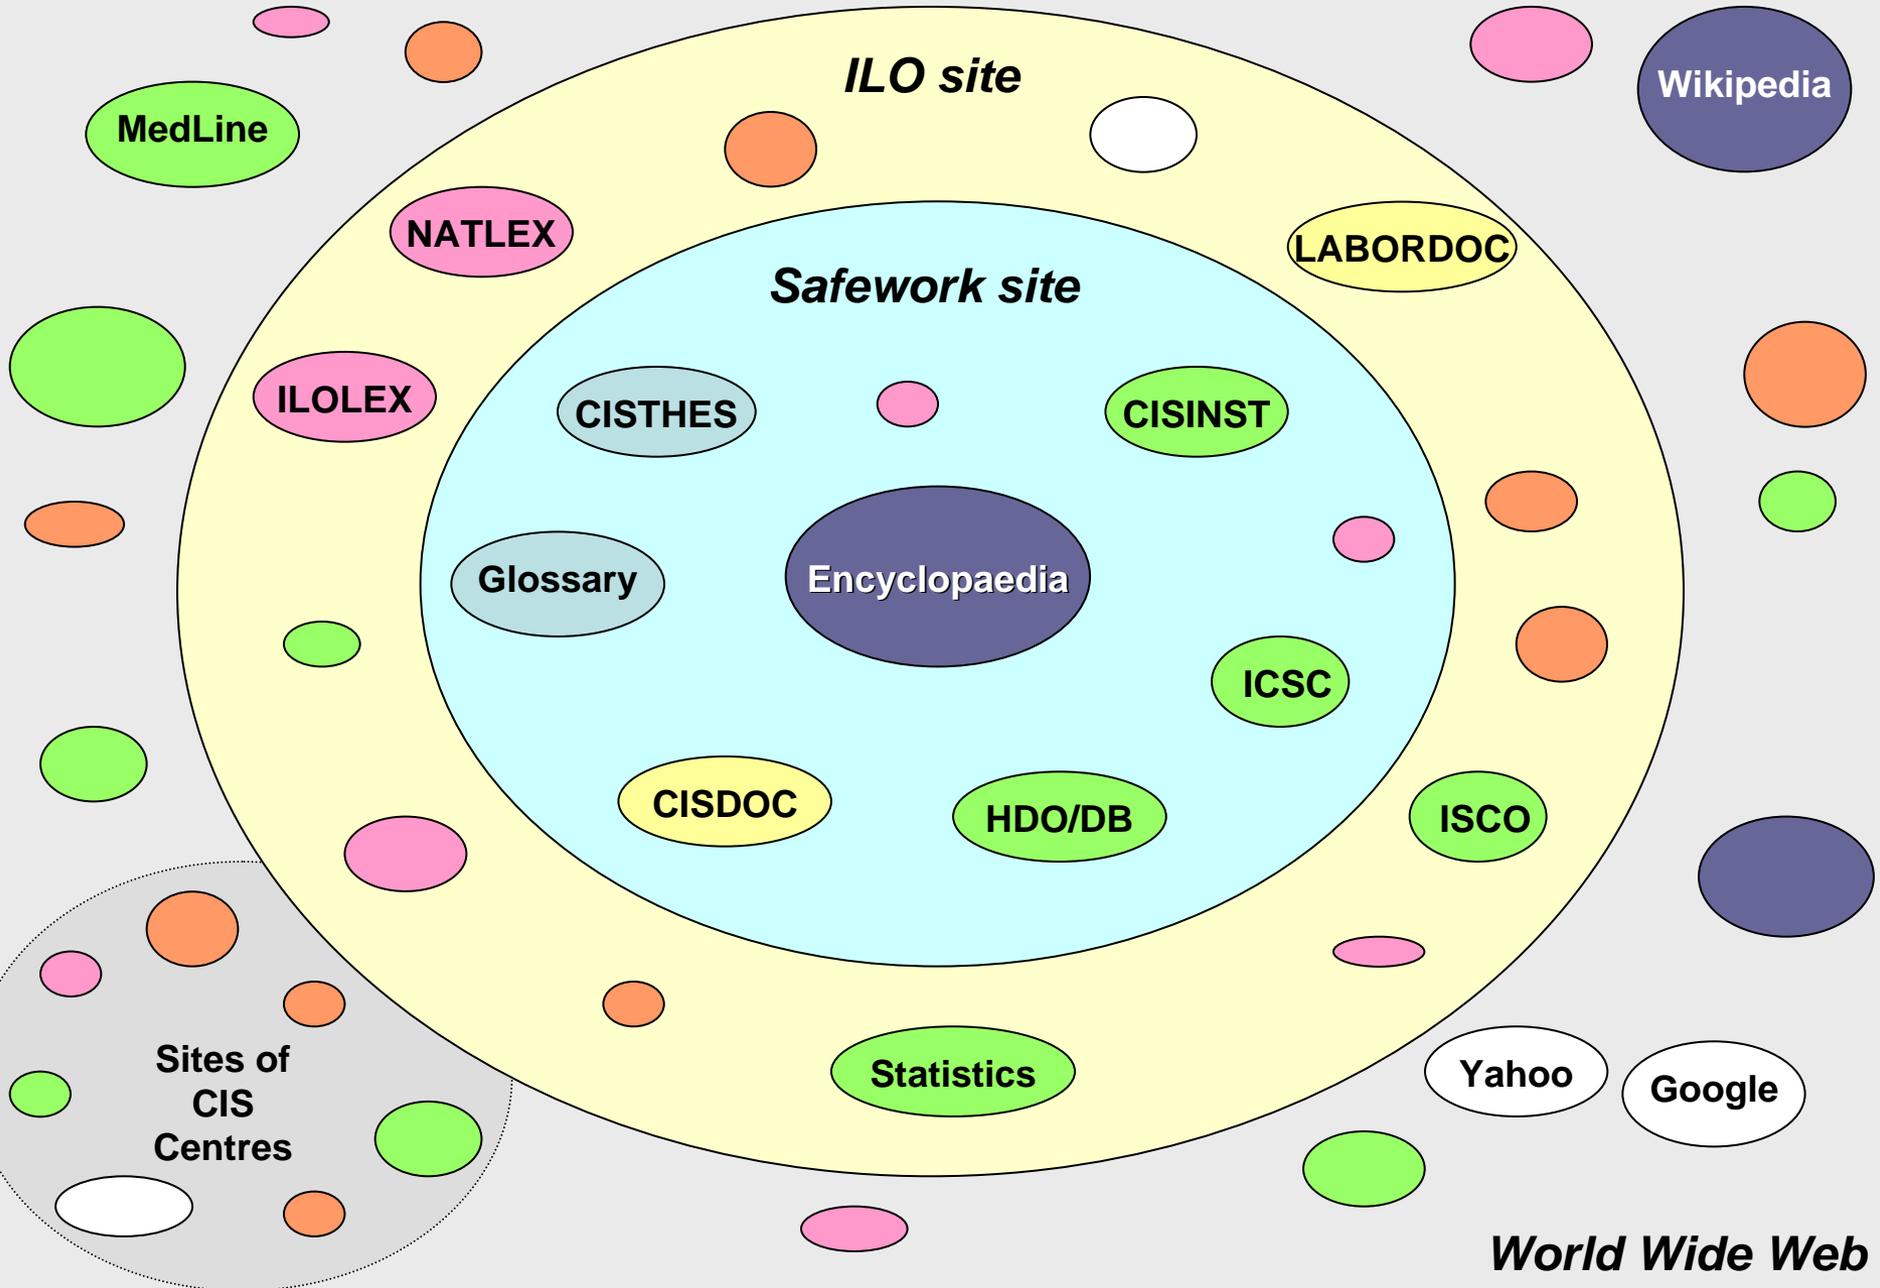

## Information Depository

# The Safework On-Line Information Depository – Information sources

## Internet-based management

- Access for all: one version – different views
- Access from anywhere
- Shortcuts to in-house and external sources

## Multiple language versions

- All components have an English version
- All components can be translated into any language
- Automatic tracking of changes

## Collaborative maintenance of certain components

- Network of dedicated editors and translators
- Country-related information

## How can you, CIS Centres help our work?

- Sending us information on the events and training courses in their country (World Day);
- Identifying experts capable and willing to contribute to the Encyclopaedia update and other databases;
- Sending us materials for the CISDOC database;
- Adding country-related information to our databases (Institutions, ICSC, HDO);
- Translating database content and interfaces (ICSC, HDO, Glossary, Thesaurus);
- Expressing your views about our products and work.

## **How can SafeWork help and recompense your work?**

- Organizing training and providing support for database editors, translators;
- Providing visibility to your institution (logo, list of contributing institutions);
- Giving credit to you personally (biography of article authors, list of editors, translators, contributors);
- Advising in information system development questions;
- Opening an online discussion forum where you can express your views and share it with others;

**Thank you for your cooperation...**
