Statistics

Order #29, 20 June, 2006

Monitoring of households

Diary of expenses

First day
Day month year

Last day
Day month year

The interviewer will visit you to get the diary.

day/month/year

Enumeration Area

Rotation

Household

The confidentiality of the information received from you is protected by the “Georgian Law of Statistics”
The information from the interview will be used only for statistical aims.

Thank you for your cooperation!

Rules for keeping the diary

- The aim of the Diary of Expenses is to keep the records on the household members' expenses on food and non-food goods and services during a week;
- The diary should record household's all expenses during the indicated 7 days period;
- The entry for each day should be done separately. Two pages are dedicated to per day notes;
- Start recording the new page by indicating the day of a week, as it is shown in the example given below;

Second day	Indicate the day of a week		
-------------------	-----------------------------------	--	--

- The table on the left page is for recording food purchased by you or harvested from your own land or received from somebody else for free and brought home;
- The upper table of the right page is for recording any of your family members' expenses for catering outside;
- The lower table of the right page is for recording the list of the non-food items bought by you or obtained for free, also the services rendered to your household members;
- Make records everyday (in order not to forget anything), as clearly, exactly and in details as possible;
- Use additional pages given in the end of the diary if the allocated area is not enough for notes. Indicate the day to which the note is applied for in the corresponding box;
- Do not write anything in the code box. It is completed in the State Department of Statistics.

Table 1

- Write down everything you brought home at indicated day, purchased as well as harvested from your own land; items obtained as gifts or as humanitarian assistance for own consumption as well as for selling (in case of own production), for cattle feeding (in case of own production) and for processing;
- Write down a detailed description of each item. For instance, do not write down "meat", instead of it specify and write down "beef", "mutton"; Do not write "flour", specify and write "wheat flour", "maize flour", etc.;
- Choose and encircle the unit of measurement, which is the most convenient for you. If you bought the product through retailing, try to evaluate the amount of grams or millilitres in each unit;
- If the product is purchased, write down how much GEL have you paid for it;
- Please, indicate the origin of the product: encircle whether it is own production, obtained for free or bought. If it is purchased, encircle where it was purchased;
- Please, indicate the purpose of each product: encircle whether it is for consumption, selling (in the case of own production) or cattle feeding;

- If you have gathered your harvest on the day of dairy recording, approximately identify and write down separately what share of whole harvest is foreseen for own consumption, selling and cattle or poultry feeding;
- Do not write down the products foreseen for a party;

Table 2

- Write down the information on the expenses made by your household member(s) for catering outside the home (in a canteen, café, street, job, etc.);
- If your household member had dinner with others and he paid the whole cost of the dinner, enter this expense into the table as well;

Table 3

- Describe non-food goods and services as clearly and in details as possible;
- While writing down expensive goods (automobile, furniture, refrigerator, TV set, etc.) do not miss minor non-food items such as newspaper, soap, toothpaste, cream, needle, matches, kerosene, etc.;
- In case of drugs, indicate its name by all means; in case of cigarettes – indicate whether it is with a filter or not, or whether it is tobacco;
- In case of clothes, point out whether it is for a woman, man or child (write down the child's age as well), whether they are for summer, winter, spring or autumn clothes;
- In case of transport, point out what kind of transport you have used: bus, mini-bus, taxi, underground, train, plane, etc.;
- While writing down the services, please, point out in the “Amount” space, how many times you have used the services that day;
- Please point out the origin of non-food and services: encircle whether they are obtained for free or as humanitarian assistance or purchased;
- While recording dairy, Please use the samples given on the next pages as a guide, where the records of various kinds of goods and services are given

Fourth Day	Indicate the day of a week		
Expenditures on food products bought for consumption in the household:	Bought in the shop - 2 loafs of bread, 500 gr each, paid GEL 1; at the market – 2 kg beef – GEL 8; 3 bunches of greens, 50 gr each – 30 tetri; 10 kg maize – GEL 5;		
For feeding of domestic animals:	5 kg maize bought at the market was used for feeding hens– GEL 2,50;		
Obtained free of charge:	10 kg beans sent from the village.		
For catering outside of home:	One household member invited his two friends to the canteen – GEL 11,5; the other household member spent GEL 1 on catering at his job; bought a pack of “Pirveli” cigarettes in the street – GEL 1; at “bazroba” – winter shoes for a two years old child, paid GEL 9		
Non-food expenditures:	Bought 6 l of petrol for the car – GEL 10; Three household members took a minibus 6 times inside the town, paid GEL 1,80 Bought 10 l of petrol for the car, paid GEL 10; paid Gel 2.4 per person (totally 4 persons) as charge for water supply; obtained free consultation from a doctor being his acquaintance		

1. Food - purchased, grown on a private land or obtained in a different way, brought home for the purpose of own consumption (including processing and storage) , selling or forage (in the case of own production)

Addition Use the additional page in case of lack of space in corresponding table for any week day. For each such record write the number of a corresponding week day.

1. Food purchased, grown on a private land or obtained in a different way, brought home for the purpose of own consumption(including processing and storage), selling (in case of domestic product) or forage;

If the same product has various destination, separate into groups and write down so, for example:

- ◆ Milk for own consumption (i.e. the amount of milk, which is used by the family – for drinking, producing matsoni, cheese, etc.);
- ◆ Milk for selling (i.e. the amount of milk, which the family sells as milk, cheese, matsoni, etc.);

- ♦ or
- ♦ Maize for own consumption (do not write the maize taken from the storage, write down the harvest brought to the family or bought or obtained for free that particular day);
- ♦ Maize for selling (only own harvest);
- ♦ Maize for forage (brought to the family for cattle feeding);

If you have nothing to write here, tick the box ☒ and move to the next table

To an interviewer: While keeping the diary, make more precise the following things: how completely the data written in the diary is in compliance with the real expenditures of the household. Namely, by asking each household member, specify whether they had any additional expenditure during the past 7 days that are not included in the questionnaire. Pay special attention to those expenditures that are made outside the home. For example, expenses on tobacco, petrol, restaurant and

pub services and others. In order to avoid double counting, before entering data into the table below, make sure that those expenses are not already included in the table.

Personal Expenses

Code	The number of a household member from shinda 02	Food and non-food goods and services (describe as clearly as possible)	Expenses of the last week, total	
			GEL	Tetri

For an interviewer: when keeping the dairy clarify:

1. Whether any household member was absent the whole night during these seven days or not (including temporarily absent members) – *encircle*

1 = Yes
2 = No

If “No”, move to the next question.

If “Yes”, calculate and write down total number of the man/days of absence from dwelling during these seven days.

Total number of the man/days of absence	
---	--

Example: If a household member was absent during three days and two other members were absent for two days each, then the number of the man/days of absence from dwelling should be calculated in the following way: (1 person x 3 days) + (2 persons x 2 days) = 7 man/days.

2. How many persons have you treated in your household during these seven days? (Please, calculate the number of man/dinners, according to the example) (parties are not included)

--

3. How many times have your household members been treated by their friends, relatives or others in their families, canteen, café, etc. during these seven days? (Please, calculate the number of man/dinners)

--

Example: If two household members had dinner 3 times and one household member had dinner 4 times, during these 7 days, then the total number of man/dinners should be calculated in the following way: (2 persons x 3 dinners) + (1 person x 4 dinners) = 10 man/dinners

4. Have you given any food-stuffs to your friends, relatives or others during these seven days? (from the food you have brought home for own consumption)

1 = Yes
2 = No

If "Yes", write down the name and amount of products (for example, 6 eggs, a bagful of peaches, about 5 kg)

4.1 Code	The name of products you gave to others	The amount of kg, litres or units	If in units, write down the size of a unit in kg or litres

The interviewer's comments and notes:
