Social Protection for Recovery
ILO-WEC Webinar
Agenda

Introduction

Section 1: Social Protection: From Challenges to Solutions

• The impact of Covid-19 crisis on social protection systems and on labour market groups; policy responses in the short, medium and long term: Ms Christina BEHRENDT, Head of Social Policy Unit, SOCPro, ILO

• The role of OSH for a safe return to work and the interplay with social protection to fight the virus and promote more resilient and safe workplaces: Ms Joaquim Pintado NUNES, Branch Chief, LABADMIN/OSH, ILO

• Safely back to work through Social Innovation: Mr Sébastien DELFOSSE, Board Member World Employment Confederation and Chair of the EU Sectoral Social Dialogue Committee

Section 2: Social Partners: Shaping Futureproof Social Protection and OSH to Support Recovery

• Workers’ perspectives on the short- and long-term needs and strategies for better social protection systems: Ms Evelyne ASTOR, Policy Advisor, Economic and Social Policy, ITUC

• Employers’ perspectives on the short- and long-term needs and strategies for better social protection systems: Mr Luis Rodrigo MORALES, Senior Advisor IOE

Q&A Session

Wrap-up

• Mr Sangheon LEE, Director, Employment Policy Department, ILO

• Ms Bettina SCHALLER, President, WEC

• Mr Jiyoung YOON, Director of International Cooperation at Korea Employment Information Service (KEIS)

Moderation

Tom Hadley
Social Protection for Recovery

ILO-WEC Webinar

Introduction
Social Protection for Recovery

Section 01

Social Protection: From Challenges to Solutions
The impact of Covid-19 crisis on social protection systems and on labour market groups: Policy responses in the short, medium and long term

WEC/ILO webinar “Social protection for the recovery”
15 October 2020
Christina Behrendt, Head Social Policy Unit, ILO Social Protection Department, Geneva
Contact: behrendt@ilo.org
The COVID-19 pandemic exposed serious gaps in social protection systems – and required urgent measures to close these gaps as a crisis response.

Situation prior to COVID-19: only 45% of global population covered - 4 billion people excluded from coverage (SDG indicator 1.3.1)

COVID-19 social protection policy response: urgent measures to extend coverage and improve benefits

Source: ILO COVID-19 Social Protection Monitor (13 October 2020)
COVID-19 social protection policy responses: two major channels

“Automatic” responses through existing social protection systems
- Countries with solid social protection systems were able to respond faster and better than others
- Protecting people’s health, jobs and incomes
- Higher resilience at both macro- and micro-level
- Social protection systems as key automatic stabilizers for the economy
- Adapting delivery mechanisms, for example through use of digital technology or physical distancing protocols

Emergency policy responses to close coverage and adequacy gaps
- Focusing in particular on workers who were previously not adequately protected
- Strongly dependent on pre-existing structures
- Using social insurance and tax-financed benefits/measures, or a combination of both
- Mobilisation of additional resources (domestic and international)
- Temporary character: one-off or short-term measures
Recovering from COVID-19: Social protection at a crossroads
Towards a new “better normal”?

Austerity context
- Limited coverage
- Minimal “safety net” benefits
- Further erosion of labour and social protection
- Limited solidarity, risk-sharing and redistribution, fiscal consolidation
- No decent work

Universal social protection systems, including floors
- Universal coverage
- Adequate protection
- Comprehensive protection
- Sustainable and equitable financing
- Adapted to the world of work
Recovery priority 1: Consolidating and accelerating the extension of social protection to those not yet protected

Key principles:
- Universality of protection, including for workers in all types of employment
- Adequacy
- Portability and transferability
- Transparency
- Gender equality
- Good governance and trust

Mandatory coverage
- Large risk pool
- High-quality benefits and services, easy access
- Simplified administrative procedures, harnessing digital technology
- High transparency and accountability, high trust
- Unified/coordinated system
- Integrated policy framework
- Sufficient fiscal space using a good mix of contribution and tax financing
- Broad and well-informed social dialogue

Voluntary coverage
- Small risk pools
- Low quality and poor access to benefits and services
- Complex and cumbersome administrative procedures
- Low transparency and accountability, low trust
- Fragmented schemes
- Isolated/disconnected policies
- Inadequate financing framework
- No social dialogue

More information: ILO policy resource package on extending social security to workers in the informal economy (informaleconomy.social-protection.org)
Recovery priority 2: Ensuring sufficient investment in universal social protection systems for more resilience

- Strengthening sustainable and equitable domestic financing mechanisms for universal social protection systems, to close coverage and adequacy gaps, including through taxes and social security contributions;
- Austerity could have significant negative impacts on progress achieved;
- Safeguarding social expenditure (IMF framework);
- International support needed to support countries with insufficient own capacities;
- Global support for universal social protection more necessary than ever (USP2030)

Recovery priority 3: Strengthening social protection systems, with the bigger picture in mind

Key priorities:

- Promoting universal social protection systems anchored in human rights and international social security standards
- Enhancing national social protection policies and strategies to make them fit for purpose, including through social dialogue
- Stronger attention to short-term benefits to facilitate life and work transitions, in particular unemployment protection, sickness benefits, maternity & paternity protection, health protection; linkages with child and long-term care, life-long learning etc.
- Strengthening coordination between employment and social protection policies for decent work

Tripartite agreed framework reflected in international social security standards and the ILO Centenary Declaration for the Future of Work

Safe return to work and interplay with social protection to fight the virus and promote more resilient and safe work places

Joaquim Pintado Nunes
Chief
Labour Administration, Labour Inspection and Occupational Safety and Health Branch
Governance and Tripartism Department
The ILO’s four policy pillars to address COVID-19

- Stimulating the economy and employment
- Supporting business, employment and income (extending social protection, employment maintenance measures, financial/tax aid to companies and other means of relief)
- **Protecting workers in the workplace** by strengthening OSH measures, adapting the modalities of work (e.g. telework), preventing discrimination and exclusion, providing access to health for the entire population and extending the use of paid leave
- **Social dialogue** (strengthening the capacity and resilience of employers' and workers' organizations, strengthening the capacity of governments and social dialogue, collective bargaining, and industrial relations institutions and mechanisms)

Updated data on the pandemic: ILO’s monitor

The intersect between OSH and social protection

- National policies should take into account the nexus between OSH and social protection (protection of workers and communities) - lack of livelihood increases risk of transmission/ transmission increases costs
- Indirect COVID- risks on mental health (stress and anxiety because of the virus and uncertainty)
- workers with adequate social protection more likely to feel secure in their health decisions (ex: staying home because of sickness, child-care)
- Absence of workers may lead to increased workload of other workers – psychosocial effects, MSD, lower perception of risk = higher number of accidents
- Safe return to work policies are more likely to assist in protecting the health of workers thus limiting the spread thus reducing the strain on social protection systems
- Special need of focusing on prevention of contagion in the informal economy – reliable information on transmission and basic infection control measures (respiratory etiquette, handwashing, use of PPE)
How to ensure return to work policies are appropriate?

1. Consider whole cycle

2. Preventative and integrated system approach

3. Never forget OSH basic principles

Unsafe work practices anywhere pose a threat to health everywhere ➤ ilo.org
Criteria suggested by the ILO when defining return to work policies

National level

- Rely on International Labour Standards as an adequate normative framework for a safe return to work, including a clear system of rights and responsibilities
- Critical role of social dialogue to ensure effective policy design and create trust
- Importance of embedding RTW policy guidance in national OSH systems to help combat COVID-19 (continuous OSH improvement, culture of prevention)
- Coordinated action of government institutions
- Policies must be gender-sensitive, prevent discrimination and assist those in vulnerable situations
- Effective, reliable, coordinated and accessible communication

Workplace level

Decisions to open, close, reopen and suspend or scale down need to be risk-based and prevention-oriented and follow an OSH management systems approach

- Look into all operations, jobs and specifics of each workplace
- Give attention to all sources of hazards
- Consider environment, task, threat, available resources and individuals
- Cooperation between management and workers
- Tailored risk assessment and implementation of OSH measures following a hierarchy of controls
- Role of safety delegates, OSH committees or workers’ representatives
- Availability of critical staff and services

In informal economy work settings: Access to basic services (water/sanitation), access to information, cost-effective solutions to avoid contagion.

ilo.org
Looking into all OSH risks and their interaction

Risk of contagion

- Contact with infectious clients/customers/suppliers/workers
- Contact with contaminated materials, surfaces & environments
- PPE not properly used, cleaned or disinfected

Psychosocial risks

- Fear for being infected
- Job insecurity
- Lack of appropriate OSH measures, including availability of PPE
- Isolation & lack of social support
- Increased workload, long working hours & reduced rest periods
- Multiple burdens (working duties, household chores, caretakers, home-schooling, etc.)
- Stigma, violence & harassment
- Difficulty in maintaining self-care activities (e.g. exercise, good eating habits, rest, etc.)

Other hazards

- Systems and machinery that may not have been properly maintained or deteriorated during lockdowns
- Cleaning and disinfection with chemicals (e.g. use of quaternary ammonium and sodium hypochlorite)
- (...)

COVID-19 and the world of work

The world of work is being profoundly affected by the global virus pandemic. In order to support governments and other stakeholders, the ILO has developed a series of recommendations for the return to work in different sectors, considering local contexts and specific industrial sectors. These recommendations are based on the ILO’s expertise and on international labor standards.

Safety and health at work

A safe and healthy return to work during the COVID-19 pandemic

This guidance note aims to assist governments and employers’ and workers’ organizations in developing national policy guidance for a phased and safe return to work, and provide guidelines for workplace-level risk assessments and implementation of preventive and protective measures according to a hierarchy of controls.

Safely Back to Work in the New Normal
Safely Back to Work in the Normal
International Alliance to support the return to work

The COVID-19 health crisis and continued lockdown in many markets is posing **unparallelled challenges** to people and economies around the world.

To limit the economic downturn and impact on people’s ability to earn a living, the labor market and all its stakeholders must **quickly adjust** to a new reality.

Leveraging the unique, international and extensive operational onboarding expertise of Private Employment Services: Over 160,000 place over 50 million people into jobs across a great variety of sectors, supported by 2.4 million staff/consultants.

Best Practice Health and Safety Protocols contains >100 collected measures in their markets. These measures can help to complement country and sector specific protocols. Industry bodies, unions, employers, governments, healthcare authorities and others can help shaping these protocols.
Safely Back to Work in the Normal
Supporting companies shaping a “Safely Back to Work” Action Plan

**Lockdown / remote period**
- Planning transition period, prototyping temporary and permanent measures to implement.

**Transition period**
- Monitoring impact of implemented measures, evaluating, refining and tweaking where needed.
- Monitoring overall COVID-19 development, being ready to scale up and down measures as needed.

**Planning and set up for return**
- Gradually scaling back all temporary measures.
- Maintaining strategy to quickly implement temporary measures in case of new emergency/virus outbreak.

**Research and co-creation to develop action plan and roadmap**
- Coaching and check-up

**Worker behaviour and policies**
- Visual Social Distancing/Sanitization Cues
- Highly Visible Workspace Cleaning
- Designated Team Guard
- Staggered Shifts and Lunch Times
- Carleen Tables Spaced and Food Served Portioned in Re-usable / Disposable Boxes
- Re-usable / disposable Boxes

**Return to work training**
- Communication plan to reach and reassure employees
- Web conferences (pre-return)
- Online trainings (Pre and Post Return)

**Safe Operations**
- Work from home kit
- Re-modelled workspace
- More Touch-free Handic Interfaces
- Improved air filtration and ventilation
- Temperature measurement upon entry
- Hygiene zones with checkpoints between
- Health ID and Employee Risk Categorization
- Hotspots marked with colour
- Upgraded PPE
- Clean working kit
Safely Back to Work in the new normal

Inspiring & Exchanging Workplace Protocols
Safely Back to Work in the New Normal
Implementing on the National Level

COVID-19 Health & Safety Protocols

As employers, our aim is to provide a risk-free environment for our personnel so that they can perform their duties and fulfill their responsibilities without additional mental stress. This will be based on the ASW guidelines and workplace protocols to maintain employee health and safety in COVID-19 contexts.

HELP INDIA GET BACK TO WORK SAFELY
Best Practices Handbook

LIFTS & STAIRWAYS
Limit to 3 people at a time.

SANITISERS
Sanitise your hands and use them frequently.

GROUP OF 5
No more than 5 people will be allowed to enter per entrance.

REGULAR DISINFECTION
Take extra precaution not to handle documents, equipment or surfaces.

AGE & HEALTH FACTOR
Employees with these factors work with additional protective measures.

COVID-19 INFORMATION
Health instructions for personnel, employee, customers and all visitors to be followed.

The next steps

What’s the role of the Private Employment Services Industry in the New Normal?
Section 01

How do Private Employment Services support Social Security, Employability and Incomes?
How do Private Employment Services support Social Security, Employability and Incomes?

The Baseline: how are agency workers covered for social security?

Statutory access to social protection branches by work arrangement, % of coverage (either full or partial/voluntary)

- Agency workers: 92%
- Fixed-term contract: 91%
- Self-employed: 56%
- Open-ended contract: 93%

Unemployment benefits: 93%
Paid sick leave: 95%
General healthcare insurance: 90%
Labour accidents/disability insurance: 96%
Maternity and parental protection & benefits: 99%
Child care/family benefits: 99%
Pensions: 95%
Training: 74%

Note: The analysis is based on four sources of information. The information was compiled into one database using the following indicators for statutory coverage: 1-full coverage, 0-only partial/voluntary access; Over access: 40 countries are included in the analysis. The percentage of statutory coverage therefore includes countries where full access is available, and those where only partial or voluntary access exists. Instead of showing the share of countries with full statutory coverage, the graphs represent a measure of how well the types of workers are protected across the countries in the sample. The Annex contains more detailed description of the methodology, the list of countries and further graphs.

- Agency workers are formally covered for social security comparable to others forms of employment
- Employment agencies contribute through work related taxes and premiums
- Coverage issues exist for self-employed
- Room for Improvement: Coverage ≠ Effectiveness
  - Portability of benefits
  - Eligibility, Thresholds & Requirements
  - Training and other career support

Value Add of Being Covered or Paying for it?

Source: WEC 2020 Social Impact Report
How do Private Employment Services support Social Security, Employability and Incomes?

**Complementing the Baseline:** complementary social protections – Best Practices

**France:** **Social Security coverage for agency workers (FAS.TT)**

To improve the social security coverage of agency workers in France, a supplementary health insurance scheme (Intérimaires Santé) has been implemented to cover medical costs and hospitalisation. This adds to the coverage already provided by the French state. The premium of the additional insurance is half covered by the employment agency. The insurance not only covers the worker, but also their family members. The scheme is jointly managed by the trade unions and Prism’emploi, the French association of private employment agencies through a bipartite fund (FAS.TT).

- **860,000** beneficiaries
- **52,000** partners & children covered
- **11,523** agency workers received support to finance worker premiums
- **€47 million** provided as benefits

**Italy:** **Social Security coverage for agency workers (EBITEMP)**

Italian trade union organisations and employers’ associations in the agency work sector set up Ebitemp, a welfare system that provides up to 14 types of benefits to workers and their families. With these innovative forms of protection, support and facilitation, they are guaranteed the right conditions to build a life project.

- **23,500+** beneficiaries
- **€2,250** contribution for pregnant (ex-) agency workers
- **€8 million** provided as benefits
- **€100** Monthly support for up to 3 new born
How do Private Employment Services support Social Security, Employability and Incomes?

Complementing the Baseline: complementary training schemes – Best Practices

Japan: Career College

JASSA Career College provides 300 different courses to temporary agency workers to develop their competences, in areas such as business/technical skills (business manner, Word, Excel, PowerPoint, etc.), career development (how to undergo an interview, life plan, career design, etc.) or training related to a specific qualification (book keeping, financial planner, real estate business, etc.).

The courses can be followed via any platform or device and is accessible to all JASSA members.

| 290,000 | AW trained |
| 400     | PrES offering Career College service |
| 300     | Different courses offered |
| 23,000  | Agency staff enrolled in Legal Test |

Switzerland: TempTraining

Temporary agency workers often look for work in various industries, staying only for a short time in one company, or lack the necessary resources to finance training on their own. To tackle this, Swissstaffing created a training fund together with the trade unions. Every agency worker that has worked over four months is entitled to a CHF 4,000 (approx. €3,500) training voucher. To compensate the loss of income during training hours, the worker is also entitled to get up to CHF 2,000 (approx. €1,800) as training allowance. The bipartite training fund has an annual budget of CHF 16 million (approx. €12.5 million). 7,544 workers used the fund to access skilling and training in 2017.

| 7,544 | AW trained (2017) |
| CHF 4,000 | Training Voucher (approx. €3,500) |
| CHF 2,000 | Income compensation to cover training hours (approx. €1,800) |
| CHF 16 million | Total annual budget |
How do Private Employment Services support Social Security, Employability and Incomes?

**Complementing the Baseline:** Covid-19 response – some best-practices

- Advocating govt for agency workers to access to Short Time Working Schemes and other relieve measures
- Leveraging Social Partnership for the employability of agency workers via specific training schemes
- Creating ad-hoc income support through social dialogue
- Celebrating and rewarding innovative learning programs to train, re- and upskill temporary workers
- Negotiating Agency Work specific workplace protocols with trade unions
How do Private Employment Services support Social Security, Employability and Incomes?

Complementing the baseline Success factors

- Recognition of Employment Agency as Employer
- Shaping an environment for Social Innovation by governments, businesses and social partners
- Social Dialogue between PrES sector and worker representatives
The Opportunity for Social Innovation
"The COVID-19 crisis has revealed the worrying consequences of coverage and adequacy gaps in social protection for some categories of workers, such as part-time workers, temporary workers and self-employed workers. It has highlighted the importance of ensuring adequate social protection coverage for workers in all forms of employment that is adapted to their circumstances, in line with international social security standards and the ILO Centenary Declaration for the Future of Work."

"The COVID-19 pandemic has reinforced the need for strong social protection systems to support all workers and their families, including through crisis and recovery. We recognize that social protection systems are facing significant and unprecedented challenges in many of our countries, including identifying and providing adequate protection for all, in particular the self-employed, platform workers, own account workers and workers in informal employment. Social protection systems also need to adapt to provide comprehensive and adequate protection to women and youth, who are often concentrated in the lowest paid, most vulnerable sectors and disproportionately represented in informal employment."

"With changing patterns of work linked to digital transformation, the classification of workers employment status has significant implications for workers’ rights and access to adequate social protection for all. We recognize that correct classification will help support the creation of regulations and policies to reduce social protection gaps, help minimize worker exploitation and ensure fair support from employers."
The Opportunity for Social Innovation
The Way Forward for Social Protection

Reform safety nets to ensure all workers have **access to effective transition and income support** as they take cautious steps back to the labour market.

Basic minimum protections need to be available **irrespective of how people engage with work**.

Reforms need to **speed up** to ensure effective access to skilling and social protection across diverse forms of work.

**Diverse forms of work sustain employment for all.** Thus, benefits, costs and risks need to be proportionately shared.

**Bank on private expertise** to deliver Social Innovation that provides value add for the people that need support.
